WORK EXPERIENCE

BRASS TECHNOLOGIES, LAGOS

Mobile Engineer | March, 2021 – Current

Brass is making banking more useful for fast growing businesses. Brass seek to make it easy for business people, entrepreneurs and freelancers to have cheap and yet premium banking services.

- Working as a Mobile Engineer at Brass with React Native.
- Built the Brass Banking Mobile
- Collaboration and Intellectual Honesty, strive in the work place to deliver the best quality to customers
- Building reusable components for Brass mobile systems, and publish to NPM.

RISE CAPITAL, LAGOS

Frontend Developer (Remote) | April, 2020 – April 2021

Rise are a technology-driven finance company connecting everyday Africans with the best dollar-denominated investment opportunities around the world. I joined Rise as Frontend Developer mainly using React and React Native

- Working on Rise Mobile Application with React Native.
- Built the Adviosry App, to help users communicate with our advisors, for finanacial advises and make solid decisions concerning their investments
- Collaborate, support and work hand-in-hand with backend, QA, design and product colleagues.
- Write clean, maintainable and testable code.
- Worked on data visualisation for our users to see their investment growth with D3.js and React Native Animation

CLANE, LAGOS

Frontend Developer (Remote/Contract) | May, 2020 – October, 2020

Clane are focused on using technology to provide access to financial products and services to more people in Nigeria and across Africa. I joined clane on a contract bases to use Angular and React Native to build finacial solutions with cutting-edge technologies like Contactless and MPOS Payment.

- MPOS Integration With React Native
- Contactless payment Integration With React Native
- Collaborate, support and work hand-in-hand with backend, QA, design and product colleagues.
- Write clean, maintainable and testable code.

SPORTCOMPASS, DENMARK

Frontend Developer (Remote) | Sep, 2019 – March, 2020

Use SportCompass to find out which bars are showing your favourite games and the first beer is always on the house. SportCompass isn't just a website, but a thriving, friendly community of football fans. Go to one of our events alone, and you'll leave with new friends.

- Change of the existing SportCompass Website to ReactJs. It was formerly built as a server-side page in Ruby
- Collaborate, support and work hand-in-hand with backend, QA, design and product colleagues.
- Cause we majorly care about mobile accesiblity, it was built as PWA
- Also worked on the Admin system, to manage Bar Owners
- Write clean, maintainable and testable code.

TELIOS SUPPORT SERVICES

Frontend Developer (Remote) | Sep, 2018 – Oct, 2019

I joined Tssdevs as a Lead Frontend Developer to work on Percayso's (A Client) systems and other TSS Systems.

- Requirements gathering and specifications
- Built responsive, accessible and performant UIs using a modern technology stack. (Basically Reactjs and GraphQL)
- Collaborate, support and work hand-in-hand with backend, QA, design and product colleagues.
- Write clean, maintainable and testable code.
- Contributed to the change of an existing application to React.

PLATFORMLEAD, IBADAN.

Frontend Developer | Aug, 2018 – Jan, 2019

I joined PlatformLead as a Frontend Developer with the goal to develop FindThePro; a web app that connects businesses and potential clients within a local community through the power of search. Built with React and Redux.

- Built the client-side application with high quality, clean, testable and maintainable code for mobile, desktop and tablets
- Participated in and contributing to technology, architecture,

workflow and design decisions.

- Worked on data visualisation with D3.js
- Unit and Functional testing with Jest and Component testing with Enzyme

FEMMEBNB, CANADA.

React Developer (Remote) | Apr, 2018 – Jul, 2018

Joined Femmebnb as a React Developer developing its Frontends in an Agile Team.

- Developing new user-facing features using ReactJS and Redux
- Building reusable components with principles of component-driven architecture and front-end libraries for future use
- End to End testing
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers

STARTUP STUDIO, VICTORIA ISLAND.

Frontend Developer (Remote) | Jun, 2017 – Mar, 2018

I worked as a Frontend Developer at Startup Studio. Building solutions with React, React-Native and VanillaJS.

- Wrote Javascript, HTML and CSS code using advanced frameworks
- Redesigned and dramatically simplified overly-complex user interfaces, while preserving all functionalities
- Work on the implementation of high-leverage features to optimize UX and conversion rates
- Single Page Application and Server Side Rendering development
- Automated frontend testing

KONGA ONLINE SHOPPING MALL, IKEJA.

Full Stack Developer | Dec, 2016 – May, 2017

I worked in a team that builds the shipping and logistics system. Tech stack: Backend Services in PHP, NodeJS/Express, Frontend Apps in Angular and React.

- Build innovative, state-of-the-art applications and collaborate with the User Experience (UX) team.
- Refactor, optimize and improve the existing codebase for maintenance and scale.
- Utilize backend data services and contribute to increasing existing data services API.
- Use test-driven development to ensure feature quality.
- Interface with customer and internal teams to gather requirements and develop software solutions.
- Document the development process, architecture, and standard components.

FIVERR

Freelance Javascript Developer | May, 2016 – Dec, 2017

I worked as a Freelance Javascript Developer on fiverr, by building solutions with React, React-Native and Nodejs.

- Did plenty of freelance work with web technologies (React, React-Native and Nodejs)
- Implementing UI/UX designs and mock-ups
- Implemented automation tasks using Grunt and Gulp
- Learnt the AWS stack
- Worked with clients from all over the world

EDUCATION

OBAFEMI AWOLOWO UNIVERSITY

Computer Engineering - CS Major | Mar, 2012 – Feb, 2017

Took courses like: Object Oriented Programming, Assembly Language, Data structures and Algorithm, Automata Theory, Compilers, Human and Computer Interactions, Project Management, Computer Architecture, Artificial Intelligence, Natural Language Processing e.t.c
Also Contributed to the Developer's Community: GDG OAU, Consonance, IEEE, WIE.

PROJECTS

GOSQUARE

React and React Native Developer | Feb, 2019 – Current

Gosquare is a logistics solution that tackles the problem of the delivery sector due to human negligence and technology constraint, especially in Nigeria where there is a rapidly growing e-commerce industry, so Gosquare is bringing easy and convenient logistics services to everyone from restaurants, small businesses, and e-commerce stores. Worked on the Admin System as a Frontend developer and React Native for the mobile.

ACCELERATETV

React Native Developer | Jan, 2018 – Jun, 2018

I was on a team building a Mobile App for Accelerate Tv with React Native, to help their users access their contents on the go. This project is sponsored by Access Bank in Nigeria, creating a platform where User can create a bank account on the Go.

COACHME ONLINE

React Native Developer | Jan, 2019 – Mar, 2019

I was the React Native developer on the CoachMe Online project. On this app coaching is brought to you where you need it, when you need it and how you need it. Certified and experienced coaches will coach you in real time in various areas like Life & Success; Business, Career, and Finance; Stress & Emotions and Relationships & Marriage.

DYSHR

Frontend Developer | May, 2018 – Dec, 2018

Dyshr is a meal restaurant discovery app for foods lovers that helps users decide where and what to eat. I am worked on the Admin of this system and built it with react js.
